

## PECB Certified ISO/IEC 27035 Lead Incident Manager

Master the implementation and management of information security incident management processes based on ISO/IEC 27035

### Why should you attend?

Whether deliberate or accidental, information security incidents are almost inevitable in the digital age, impacting organizations of all sizes and sectors. Learning to navigate the complexities of information security incident detection, assessment, response, and reporting allows participants to assist organizations in ensuring the safety of their information and reducing negative business consequences.

This training course aligns with **ISO/IEC 27001**, **ISO/IEC 27005**, and other standards in the ISO/IEC 27000 series and provides practical guidance on information security.

Upon completing the course and its exam, participants can apply for the "PECB Certified ISO/IEC 27035 Lead Incident Manager" credential, showcasing their proficiency in strategically and effectively managing and mitigating information security incidents.

## Who should attend?

This training course is intended for:

- Managers or consultants seeking to expand their knowledge of information security incident management
- Professionals seeking to establish and manage effective incident response teams (IRTs)
- IT professionals and information security risk managers seeking to enhance their knowledge in information security incident management
- Members of incident response teams
- Incident response coordinators or other roles with responsibilities for incident handling and response

## Course agenda

Duration: 5 days

### Day 1 | Introduction to Information Security Incident Management and ISO/IEC 27035
